COMPUTER SOFTWARE

- 2000 - present SLControl
<http://www.slcontrol.org>
SLControl is software for acquiring and analyzing experimental data quantifying the contractile properties of muscle.
- 2009 - present GelBandFitter
<http://www.gelbandfitter.org>
GelBandFitter is a computer program that uses non-linear regression techniques to fit mathematical functions to densitometry profiles of protein gels. This allows for improved quantification of gels with partially overlapping and potentially asymmetric protein bands. The program can also be used to analyze immunoblots with closely-spaced bands
- 2007 - present DEngine
<http://www.dengine.org>
DEngine (which stands for Distributed computing ENGINE) is a collection of computer programs that allows multiple machines to work together (using 'spare' screen-saver processing power) to solve large-scale mathematical problems.
- 2013 - present MyoSim
<http://www.myosim.org>
MyoSim is computer software that can be used to simulate the mechanical properties (force, shortening, power output, etc.) of striated muscles. It was developed in the Campbell lab and is feely available under the GNU General Public License.
- 2017 - present MMotH
<http://www.mmoth.org>
MMotH (Multiscale Model of the Heart) is collaborative project led by Dr. Campbell and Dr. Jonathan Wenk. The goal is to develop a multi-scaled computer model that can predict how cardiac structure and function remodel in response to genetic and/or therapeutic modulation of myosin kinetics. The project is funded by a 5-year U01 grant.

WEBSITES

- 2008 - 2011 Center for Muscle Biology
<http://www.mc.uky.edu/muscle>
I was solely responsible for the development of the website for the Center for Muscle Biology in December 2008 and maintained the resource until 2011. I created more than 90% of the content for the original site which had about 100 pages.
- 2010 - 2012 Department of Physiology grants database
<http://www.ukpgygrants.org>
UKPGYGrants.org was a website where members of the University of Kentucky Physiology department could view grant applications submitted by other colleagues and post their own proposals for others to view. The goal was to provide a simple way of sharing knowledge and experience so that departmental members could submit stronger and better grant applications. I created the original site in 2010 and maintained it for 2 years
